

## Spring Is in the Air!

April 2025

### Warmer Days Are on the Way

Even though the thermometer isn't quite where we expect to see it in April (we'll take another 10 or more degrees, please), we can see buds on the trees, the daffodils and crocuses have been out for a while, and the birds are active again. Those signs point towards warmer days ahead. (And if April showers really do bring May flowers, it's going to be a real show in a few weeks.)

It's time for us to turn our attention to those "end of season" messages. If your heating system barely made it through the winter, we've got some great rebate opportunities on new equipment. Time for air conditioning planning? You can save \$750 on ductless or whole-home systems, plus some other great perks. See all the details below. And it's time to think about spring cleaning – of your heating system and A/C. Annual inspections ensure your equipment is working as efficiently as possible. Call now to get a date that works for you.

As we head into some of the holiest days for those who celebrate Passover and Easter, we wish you a blessed time with your family and friends and here's to a little extra chocolate around the house!

### Spring Cleaning for Your Equipment

Call now to schedule an annual cleaning for your AC equipment. And it's also a great time to have your heating equipment cleaned, too. You'll be ready for the summer AND the fall!

**Call to Schedule Cleaning**

### It's the Right Time for New Heating Equipment

If your heating system is around 15 years old, or if it gave you some headaches this past winter, it may be time to consider new equipment. And a new rebate program from the state of Connecticut, plus Tracey Energy's financing program, could make this the perfect time to start thinking about next heating season.

The state of Connecticut is offering rebates up to \$1,000; \$600 for double wall oil storage tanks; and \$150 for single-wall oil tanks. Call us and we can give you all the information on brands, options, and what rebates you might qualify for. **Check out the top brands we carry as well as information about our financing program.**

### A Q&A on Ductless Units

Here are some common questions and answers to help you decide if these energy-efficient units are right for you.

#### When do ductless units make sense?

Ductless units are quiet and 30 – 50 percent more energy efficient than window units while providing excellent cooling. They are ideal for homes without ductwork, where retrofits are necessary, in a compact space, or in a new home addition. Units are slim, compact, and can be installed high on a wall or even on the ceiling where they don't obstruct your windows or any other part of the room.

#### How do ductless units work?

Ductless units blow cool air into one specific living space. A unit includes an indoor component with an evaporator coil and blower fan, and an outdoor component that contains the compressor, condenser coil and fan. The indoor and outdoor parts connect with copper refrigerant tubing and electrical wiring. One outdoor ductless system can support up to four indoor units.

#### What brands does Tracey Energy work with?

We install and service Heil, Mitsubishi, Fujitsu, Bryant and Rheem equipment, considered leaders in full-home and ductless AC equipment.

#### Does Tracey Energy provide financing programs?

Yes. Tracey Energy is an approved **National Energy Improvement Fund Contractor** offering financing programs that work with your budget.

Call us and let's talk about whether ductless units are the right choice for you!

## Our Best Air Conditioning Offer EVER!

**\$750 off, 2-year service plan FREE, top manufacturers, financing**

**Order New AC Equipment NOW!**

**\$750 OFF**

ductless units or whole-home systems

**FREE!**

Two-year service plan

**5-STAR HVAC TEAM**

**Top AC Manufacturers**

**Financing Available**

Offer Expires May 31, 2025

While you might (finally) be opening a few windows to get some fresh air into the house, you will soon want to *close* those windows again because it's too hot and it's time to turn on the air conditioning. Provided, of course, you have air conditioning and it's working properly. That's where we come in.

Whether you're looking for a whole-home system or ductless units to replace those unsightly window units to cool specific rooms, start with a call to Tracey Energy's team of HVAC professionals. We have the expertise and products from several top AC manufacturers to provide you with recommendations, quotes, installation service, and financing programs to keep you and your family cool and comfortable.

### Get Outdoors & Celebrate Earth Day!

Earth Day, April 22, began in 1970 and is set aside to help us all appreciate the finite natural resources we have on this beautiful blue planet. Take some time to go for a hike, sit outside, plant something, clean up a park, or just breathe some fresh air! There are also activities all over the state. **Check some of them out here.**
